---

# Letters of Intent to Use Local Climate Action Scoreboard from 20 Local Communities

**LIFE ClimatePath2050 (LIFE16 GIC/SI/000043)**

The *Letters of Intent to Use Local Climate Action Scoreboard from 5 Local Communities* is a deliverable of the project LIFE ClimatePath2050 »*Slovenian Path Towards the Mid-Century Climate Target*,« (LIFE Podnebna pot 2050, Slovenska podnebna pot do sredine stoletja, LIFE16 GIC/SI/000043), which is implemented by a consortium lead by Institute Jožef Stefan, and partners: ELEK, načrtovanje, projektiranje in inženiring, d.o.o., Gradbeni Inštitut ZRMK d.o.o., Inštitut za ekonomska raziskovanja, Kmetijski inštitut Slovenije, PNZ svetovanje projektiranje, d.o.o., Gozdarski inštitut Slovenije and external partners. External partner Golea, Goriška lokalne energetska agencija contributed to this deliverable.

#### REPORT TITLE/NASLOV POROČILA:

**Deliverable C4.0:** Letters of Intent to Use Local Climate Action Scoreboard from 20 Local Communities

**Poročilo C4.0:** Pisma o nameri dvajsetih lokalnih skupnost, da bodo uporabljale Lokalni semafor podnebnih aktivnosti

## Introduction

The purpose of the **Letters of Intent to Use Local Climate Action Scoreboard from 5 Local Communities** is to involve local communities into the project with aim to use project results () for guiding their climate actions.

### Status

By September 15<sup>th</sup>, 2017, 20 local communities already supported the project by signing letters of intent (LOI) to participate in the project and confirm intent to:

- Use the »Local Climate Action Scoreboard«;
- Consider the use of the »Local Planning Toolkit with Guidelines« and »Climate Mitigation Potentials 2050 and Mid-term Challenges – local planning supplement« for the preparation of their own plans;
- Support the project also by participating in project activities at the national level.

The following 20 local communities signed LOI:

- Ajdovščina
- Divača
- Grosuplje
- Hrpelje Kozina
- Idrija
- Ilirska Bistrica
- Ivančna Gorica
- Jezersko
- Kanal ob Soči
- Komen
- Koper
- Logatec
- Maribor
- Miren-Kostanjevica
- Moravče
- Nova Gorica
- Pivka
- Sežana
- Šempeter-Vrtojba
- Tolmin.

A plan for the implementation of the project results at the local level is elaborated in the project Inception report (Deliverable F1.1).

## ANNEX: LETTERS OF INTENT

- Ajdovščina
- Divača
- Grosuplje
- Hrpelje Kozina
- Idrija
- Ilirska Bistrica
- Ivančna Gorica
- Jezersko
- Kanal ob Soči
- Komen
- Koper
- Logatec
- Maribor
- Miren-Kostanjevica
- Moravče
- Nova Gorica
- Pivka
- Sežana
- Šempeter-Vrtojba
- Tolmin.

## Letter of intent for participation in the "LIFE ClimatePath2050" project

We, Občina Ajdovščina / Municipality of Ajdovščina would hereby like to confirm our commitment of the Občina Ajdovščina / Municipality of Ajdovščina to participate in the project "LIFE ClimatePath2050, Slovenian Path towards the Mid-Century Climate Target", a project financed from EU LIFE Programme, under priority area Climate Governance.

We see the "LIFE ClimatePath2050" project as an excellent opportunity to reinforce the climate governance in Slovenia and to contribute to preparation, implementation and at monitoring and guiding climate mitigation actions also at the local level with several positive benefits.

Consequently, Občina Ajdovščina / Municipality of Ajdovščina intends to support the project LIFE ClimatePath2050 activities by participating in "The Local Climate Action Scoreboard" task. We find the scoreboard an interesting tool for monitoring progress of climate actions at the local level. It will provide useful benchmarks on GHG mitigation actions in the local community: e.g. number of energy efficiency renovated buildings in the local community, length of bicycle lines, GHG targets set, etc. It will enable comparison among local communities as regards implementation of climate actions and together with networking at local scoreboard events it will be a good incentive for enhancing actions and ambitions, and exchange information with other communities on benefits and practical experiences. Občina Ajdovščina / Municipality of Ajdovščina confirm our interest to participate in the development and testing phase and to use the "Scoreboard" in its implementation phase. We also intend to participate in project local scoreboard events in June each year.

We see that the other project results for local communities "Local GHG Mitigation Planning Toolkit with Guidelines" together with "Climate Mitigation 2050 Potentials and Mid-term Challenges – local planning supplement" have high potential to be used at the preparation of our future planning documents, particularly at the preparation of Local Energy Concept and/or Comprehensive Transport Strategy. We confirm to consider "The Local Climate Action Scoreboard", "Local GHG Mitigation Planning Toolkit with Guidelines" and "Climate Mitigation 2050 Potentials and Mid-term Challenges – local planning supplement" at preparation our future strategic documents and climate actions.

Občina Ajdovščina / Municipality of Ajdovščina intends to support the project also by participating in national policy making processes for the preparation of "Annual Climate Action Mirrors" and national "Mid-Century Climate Strategy".

Yours faithfully,

Mitja Tripkovič  
Deputy Mayor

## Letter of intent for participation in the "LIFE ClimatePath2050" project

We, municipality of Divača would hereby like to confirm our commitment of the municipality of Divača to participate in the project "**LIFE ClimatePath2050, Slovenian Path towards the Mid-Century Climate Target**", a project financed from EU LIFE Programme, under priority area Climate Governance

We see the "LIFE ClimatePath2050" project as an excellent opportunity to reinforce the climate governance in Slovenia and to contribute to preparation, implementation and at monitoring and guiding climate mitigation actions also at the local level with several positive benefits.

Consequently, municipality of Divača intends to support the project LIFE ClimatePath2050 activities by participating in "**The Local Climate Action Scoreboard**" task. We find the scoreboard an interesting tool for monitoring progress of climate actions at the local level. It will provide useful benchmarks on GHG mitigation actions in the local community; e.g. number of energy efficiency renovated buildings in the local community, length of bicycle lines, GHG targets set, etc. It will enable comparison among local communities as regards implementation of climate actions and together with networking at local scoreboard events it will be a good incentive for enhancing actions and ambitions, and exchange information with other communities on benefits and practical experiences. Municipality of Divača confirm our interest to participate in the development and testing phase and to use the "Scoreboard" in its implementation phase. We also intend to participate in project local scoreboard events in June each year.

We see that the other project results for local communities "**Local GHG Mitigation Planning Toolkit with Guidelines**" together with "**Climate Mitigation 2050 Potentials and Mid-term Challenges – local planning supplement**" have high potential to be used at the preparation of our future planning documents, particularly at the preparation of Local Energy Concept and/or Comprehensive Transport Strategy. We confirm to consider "**The Local Climate Action Scoreboard**", "**Local GHG Mitigation Planning Toolkit with Guidelines**" and "**Climate Mitigation 2050 Potentials and Mid-term Challenges – local planning supplement**" at preparation our future strategic documents and climate actions.

Municipality of Divača intends to support the project also by participating in national policy making processes for the preparation of "**Annual Climate Action Mirrors**" and national "**Mid-Century Climate Strategy**".

Yours faithfully,

Municipality of Divača Mayor:

Alenka Štruel-Dovgan

Grosuplje, 20.07.2017

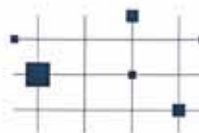

## Letter of intent for participation in the "LIFE ClimatePath2050" project

We, Municipality of Grosuplje would hereby like to confirm our commitment of the Municipality of Grosuplje to participate in the project "**LIFE ClimatePath2050**, Slovenian Path towards the Mid-Century Climate Target", a project financed from EU LIFE Programme, under priority area Climate Governance.

We see the "LIFE ClimatePath2050" project as an excellent opportunity to reinforce the climate governance in Slovenia and to contribute to preparation, implementation and at monitoring and guiding climate mitigation actions also at the local level with several positive benefits.

Consequently, Municipality of Grosuplje intends to support the project LIFE ClimatePath2050 activities by participating in "**The Local Climate Action Scoreboard**" task. We find the scoreboard an interesting tool for monitoring progress of climate actions at the local level. It will provide useful benchmarks on GHG mitigation actions in the local community: e.g. number of energy efficiency renovated buildings in the local community, length of bicycle lines, GHG targets set, etc. It will enable comparison among local communities as regards implementation of climate actions and together with networking at local scoreboard events, it will be a good incentive for enhancing actions and ambitions, and exchange information with other communities on benefits and practical experiences. Municipality of Grosuplje confirms our interest to participate in the development and testing phase and to use the "Scoreboard" in its implementation phase. We also intend to participate in project local scoreboard events in June each year.

## Letter of intent for participation in the "LIFE ClimatePath2050" project

We, Municipality of Koper (Mestna občina Koper) would hereby like to confirm our commitment of the Municipality of Koper to participate in the project "LIFE ClimatePath2050, Slovenian Path towards the Mid-Century Climate Target", a project financed from EU LIFE Programme, under priority area Climate Governance.

We see the "LIFE ClimatePath2050" project as an excellent opportunity to reinforce the climate governance in Slovenia and to contribute to preparation, implementation and at monitoring and guiding climate mitigation actions also at the local level with several positive benefits.

Consequently, Municipality of Koper intends to support the project LIFE ClimatePath2050 activities by participating in "The Local Climate Action Scoreboard" task. We find the scoreboard an interesting tool for monitoring progress of climate actions at the local level. It will provide useful benchmarks on GHG mitigation actions in the local community: e.g. number of energy efficiency renovated buildings in the local community, length of bicycle lines, GHG targets set, etc. It will enable comparison among local communities as regards implementation of climate actions and together with networking at local scoreboard events it will be a good incentive for enhancing actions and ambitions, and exchange information with other communities on benefits and practical experiences. Municipality of Koper confirms the interest to participate in the development and testing phase and to use the "Scoreboard" in its implementation phase. We also intend to participate in project local scoreboard events in June each year.

We see that the other project results for local communities "Local GHG Mitigation Planning Toolkit with Guidelines" together with "Climate Mitigation 2050 Potentials and Mid-term Challenges – local planning supplement" have high potential to be used at the preparation of our future planning documents, particularly at the preparation of Local Energy Concept and/or Comprehensive Transport Strategy. We confirm to consider "The Local Climate Action Scoreboard", "Local GHG Mitigation Planning Toolkit with Guidelines" and "Climate Mitigation 2050 Potentials and Mid-term Challenges – local planning supplement" at preparation our future strategic documents and climate actions.

Municipality of Koper intends to support the project also by participating in national policy making processes for the preparation of "Annual Climate Action Mirrors" and national "Mid-Century Climate Strategy".

Yours faithfully,

Boris Popovič,

the mayor of Municipality of Koper

Po pooblastilu župana  
PODŽUPAN  
Peter Božič

MUNICIPALITY OF LOGATEC

MAYOR

Date: 18. 8. 2017

## Letter of intent for participation in the "LIFE ClimatePath2050" project

The Municipality of Logatec would hereby like to confirm our commitment of the Municipality of Logatec to participate in the project "**LIFE ClimatePath2050**, Slovenian Path towards the Mid-Century Climate Target", a project financed from EU LIFE Programme, under priority area Climate Governance.

We see the "LIFE ClimatePath2050" project as an excellent opportunity to reinforce the climate governance in Slovenia and to contribute to preparation, implementation and at monitoring and guiding climate mitigation actions also at the local level with several positive benefits.

Consequently, Municipality of Logatec intends to support the project LIFE ClimatePath2050 activities by participating in "**The Local Climate Action Scoreboard**" task. We find the scoreboard an interesting tool for monitoring progress of climate actions at the local level. It will provide useful benchmarks on GHG mitigation actions in the local community: e.g. number of energy efficiency renovated buildings in the local community, length of bicycle lines, GHG targets set, etc. It will enable comparison among local communities as regards implementation of climate actions and together with networking at local scoreboard events it will be a good incentive for enhancing actions and ambitions, and exchange information with other communities on benefits and practical experiences. Municipality of Logatec confirm our interest to participate in the development and testing phase and to use the "Scoreboard" in its implementation phase. We also intend to participate in project local scoreboard events in June each year.

We see that the other project results for local communities "**Local GHG Mitigation Planning Toolkit with Guidelines**" together with "**Climate Mitigation 2050 Potentials and Mid-term Challenges – local planning supplement**" have high potential to be used at the preparation of our future planning documents, particularly at the preparation of Local Energy Concept and/or Comprehensive Transport Strategy. We confirm to consider "**The Local Climate Action Scoreboard**", "**Local GHG Mitigation Planning Toolkit with Guidelines**" and "**Climate Mitigation 2050 Potentials and Mid-term Challenges – local planning supplement**" at preparation our future strategic documents and climate actions.

Municipality of Logatec intends to support the project also by participating in national policy making processes for the preparation of "**Annual Climate Action Mirrors**" and national "**Mid-Century Climate Strategy**".

Yours faithfully,

Berto Menard  
the mayor of Municipality of Logatec
